

What You Need to Know About 3D Cloud Kitchen Designer for Pro Users

**Built for
kitchen designers**

**Design workflow
in 30 minutes**

**Real time photorealistic
3D renders**

**Multi format
contractor exports**

**Cloud-based,
accessible anywhere**

What makes 3D Cloud Kitchen Designer for Pro Users Unique?

The 3D Cloud Kitchen Designer transforms the traditional kitchen design process by combining intelligent consultation workflows with enterprise-grade 3D visualization. The system integrates real appliance catalogs, material libraries, and pricing data to create accurate, buildable designs that clients can visualize and approve in real-time.

Fast Facts

- Purpose-built for kitchen design professionals
- Consultation-to-design workflow in under 30 minutes
- Real-time 3D rendering with photorealistic materials
- Multi-format exports for contractors and installers
- Material list and pricing outputs for quoting
- Cloud-based platform accessible anywhere, anytime

15-20min Avg. consult time

5-10min Avg. session duration

50K+ Kitchen designs created

95% Client approval rate (first presentation)

3x Faster design process speed

40% Reduction in design revision cycles

Is it secure?

All 3D Cloud applications are hosted in a secure cloud environment with layered architecture, redundancy, and 24/7 monitoring. Penetration and vulnerability testing are conducted regularly. 3D Cloud is SOC 2 Type I & II and ISO 27001/2013 compliant. Client design data is encrypted and backed up automatically.

Will it work with our other systems?

- CRM integration for client management and follow-up
- Pricing APIs for real-time appliance and material costs
- CAD export compatibility for contractor handoff
- Marketing automation for proposal generation
- Project management tools for design workflow tracking
- Cloud storage for design library and client access

How is 3D Cloud Kitchen Designer different?

- ✓ **Instant 3D visualization:** See designs come to life in real-time
- ✓ **Designer workflow optimized:** Built by designers, for designers
- ✓ **Marketing materials included:** Professional presentations and tear sheets
- ✓ **Time-saving automation:** Generate floor plans, elevations, and BOMs automatically

Exclusive Features

Cloud Based Platform	Cloud-based: access from any computer
Lead Generation Apps	Pre-design lead qualification; interactive upper-funnel tools (5 to 15 minutes)
3D Perspective View	Design in 3D with a single screen
High Definition Renders	2K renders in seconds; 4K and 8K in minutes
Inspiration Rooms	Inspiration rooms that auto-generate designs
Floorplan Creation and Architectural Features	Draw, trace or scan your floor plan. Add doors, windows, openings to build a space
Keyboard Shortcuts	Hotkeys and design shortcuts; work without the mouse
Catalog Swapping	Single-click catalogue swapping
Read-Only Sharing	View and share projects with a read-only option
Save Product Favorites	Save and share favourites with other designers
Automated Customer Estimate Export	Customer estimates in three clicks
Automated Customer Design Presentation Export	Complete project pack in three clicks
Analytics Dashboards (Looker)	Analytics dashboard: sessions, users, projects, conversion rates and other KPIs
Staging Content (Standard & Custom)	Extensive, on-trend décor and staging library

Standard Planner Features

Plan & Elevation Views (Orthographic)	Overhead and elevation line drawings with room, architectural and product dimensions
Custom Countertop Editing	Edit worktop dimensions and edge profiles
Style Quiz	Select images, colours, styles, textures, likes/dislikes and goals to generate a mood board and style profile
Estimator	Choose layout, island or peninsula, dimensions, features, quality, storage and surfaces to build a budget
Visualizer	Interact with an inspirational kitchen and select cabinets, styles, countertops, hardware, appliances or pre-configured designs
CRM/Designer Portal Integration	Customers can save and share projects; designers can view preferences and edit customer projects
Floorplan Creation & Architectural Features	Draw, trace or scan your floor plan, then add doors, windows and openings to build the space
Custom Ceilings	Supports vaulted, angled, cathedral and custom ceilings
Room Scan Features (iOS only)	Scan a room to auto-generate a floor plan and upload it to the planner instantly

Customized Inspiration Rooms	Up to 10 inspirational rooms and 10 template rooms to show what is possible with the planning tool
3D Perspective View	Navigate the room in 3D
Product Placement & Positioning	Drag and drop, or use shortcut keys for precise alignment
Design & Measurements	View and create room and product-to-product dimensions
Product Grouping & Saving	Group products (e.g., kitchen islands), mark as favourites and share with other designers
Advanced Product Styling (v9.2)	Toe-kick modifications and cut-downs; supports catalogue-specific custom options
Cabinet Handle Quality/Orientation	Catalogue-specific features supported, including cabinet hardware positioning along the frame
Global Room Style Features	Swap all cabinet colours or set different colours for upper and lower cabinets
Tiling Patterns & Grout	Apply different tiles and patterns to surfaces
Custom Image Upload	Upload any photo to create custom wall textures or murals
Plans & Elevations View Settings	Control feature visibility per view
Custom Annotations	Add notes for customers or installers
Automatic & Manual Measurements	Control measurement visibility and capture custom measurements
Staging Content (Standard & Custom)	Choose from thousands of 3D models to personalise and complete the scene (décor, furniture, pets, etc.)
Sun Position & Time of Day Lighting	Adjust lighting direction and hue to optimise HD renders
Render Style Options	Real-time views: wireframe, white fill, colour fill, etc.
Post-Process Image Editing	Post-render image adjustments for additional control
Standard Bill of Materials	Customised bill of materials (BOM) available
Edit Bill of Materials	Edit quantities and add off-scene products to the BOM
Client-Branded UX	Integrate the planner with your website and brand
Rapid Placement	Enhanced snapping and rapid unit placement to set cabinets with minimal clicks
High Def Room Render Preview	Preview renders
360 Panoramas	Customers can view their room in a browser or VR headset
Custom BOM Features	Develop custom BOM features
Enhanced Room Drawing	Enhanced room drawing: continuous mode, angle snapping, auto-enclose and double-click to start

Global Wall Editing	Global wall height control: change all wall heights in one place
Automatic Interior Room Dimensioning	Interior wall measurements for more accurate layouts
Product Styling	Updated Style All menu reduces clicks for space-wide styling
Multi-select to edit at scale	Multi-select (product or legend) in-scene to edit at scale
Customizable Legend	Choose detail level, nomenclature, SKU and product name
Quick Align	Align objects to the same plane (top, bottom, centre)
Quick View Changes	Hotkeys to switch views: elevations, 2D, 3D and product list
Wet-Zones in Bathrooms	Bathroom journey: place wet zones to meet safety requirements

Coming Soon

- Customers can view their project and BOM and collaborate with designers
- Photograph your kitchen to capture dimensions and cabinet details, then load it into the room planner

Who is using 3D Cloud Kitchen Designer?
